Press release

During this night, Rompetrol faced a complex cyber-attack. We are in constant contact with the National Directorate of Cyber Security (DNSC) and fully involved to resolve the situation.

To protect the data, the company has temporarily suspended the operation of the websites and the Fill&Go service, both for the fleets and for the private customers. The activity of Rompetrol gas stations is carried out normally, the customers having at their disposal the option of payment in cash or by bank card.

Also, the operational activity of the Petromidia refinery is not affected.

We apologize for the inconvenience.
