ADDITIVES				
The product is additivated with:				
- Static Dissipator (Stadis 450) type RDE/A/621	mg/l	-	3	According to Unit notification
- Antioxidant (2,6-ditertiary-butyl-4- methyl phenol), tip RDE/A/607	mg/l	-	24	

NOTES: **1)** Accredited test by RENAR **2)** at delivery, after electrical conductivity additive injection **3)** It is certified that the samples have been tested using the Test Methods stated and that the Batch represented by the samples conforms with AFQRJOS Checklist Issue 36/February 2025 and DEF STAN 91-091 Issue 19. **4)** This condition is guaranted by the manufacturing technology and is checked weekly on the average sample of the tanks. **5)** For demonstrating product compliance, it is sufficient to meet and report either of the following requirements: particle count, determined in accordance with IP 565, or particulate contamination, determined in accordance with ASTM D5452-23 (max. 1 mg/L).

Quality control: control is done on lot.

Each batch will have max. 2000 tones for delivery in tank wagons and road trucks or tank capacity for delivery through pipelines. The lot will have product of same type.

During testing, the product must comply with all parameters depicted in standard specification for corresponding product/type. If not, the batch is rejected.

In case of dispute, the quality control will be performed on samples taken in accordance with the sampling procedure and kept for this case.

Sampling procedure: SR EN ISO 3170:2025 / ASTM D 4057-22

Information on product classification, packing, labelling, handling, transport and storage: according to SDS 2.4.T.

The Integrated Management System is certified according to the following standards:

- ISO 9001
- ISO 14001
- ISO 45001
- ISO 50001

The test lab is accredited by RENAR, in compliance with SR EN ISO/CEI 17025.
